

Setting Disney+ Parental Controls Instructions:

One measure Disney has introduced is a PIN access system to subscriber profiles. This will prevent curious little ones from trying to access Disney+ via a profile tailored to adults.

1. If you're not already subscribed, sign up to Disney+ and open it on your TV, tablet, phone or other device.
2. If you want to watch the 18+-rated material press 'Full catalogue'. If not, press 'Not now.' You'll need to confirm this with your password. If you select the latter, your account will automatically be given a 14+ age rating.
3. Now you'll get the option to create a four-digit profile PIN.

How to set age ratings on Disney+

If you have a number of profiles in use on your Disney+ account, you can customise each of them with a specific age rating. And if your family only has one account? Now's a good time to set up at least one more that's purely for kids or for adults.

1. Open Disney+
2. Tap the profile icon, and then select 'Edit profiles' from the dropdown menu.
3. Choose the profile with the age rating you want to adjust.
4. Under the 'Parental controls' section, select 'Content rating' and enter your account password.
5. Now you can apply an age rating to the profile: 6+, 9+, 12+, 14+, 16+ or 18+.

With this age rating in place, the Disney's library is set to automatically filter out any films or shows that aren't suitable for that age bracket.
